

Teaching Task #1

Team Building

Prepare for next week an activity that might be used during the first week of school to develop your class climate.

Many of you have experienced these strategies in summer camps, at ROPES training or in other classes. Several books are available to peruse for new ideas.

Keep in mind these criteria:

- 1. Risk level**
- 2. Time (you will have five minutes to demonstrate)**
- 3. Ease of completion**
- 4. Success rate (total inclusion)**
- 5. Humor**
- 6. M.I. utilized (bodily-kinesthetic, musical, spatial/visual, interpersonal, etc.)**

While a team building task may not have all these criteria, think of which ones are part of the one you select.

After leading the class in this activity, you will receive feedback. This information is to be processed in the Do-Look-Learn (DLL) format. Examples are in the DLL packet.

This is your first reflective teaching process paper. While it might be brief, it contains the essentials for review after teaching a lesson.

Please turn this in next week.
